

Description

We remill this product from salvaged, weathered Maryland oak fence planks. The material is a blend of red and white oaks, sometimes more of one than the other. Some of the material was painted black. We typically mill it to produce the look in our photos, but we can also skip-plane it to retain more of the original surface. Like all of our reclaimed oaks, this is a durable wood floor with medium character and medium patina.

Solid Flooring Specs

- * 100% Recycled | Contributes to LEED® MRc3: Material Reuse
- * Kiln dried to 8%, +/-2% before milling to stabilize/sanitize
- * Thickness: 3/4" | Plank Lengths: 2' - 7'
- * Widths 4" OR 4-1/2"
- * End-matching is standard | Beveling is optional (no charge)
- * Unfinished, prefinishing is optional. (See "Prefinishing Options" section.)

ERA™ Engineered Flooring Specs

-- Not available --
